Art Unit: 2818

DETAILED ACTION

1. In response to the communications dated 05/06/2003, claims 21-35 are active in this application.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and /or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.3.12. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The following amendment has been made upon agreement by applicant during a telephone conversation with Mr. Jeffrey A. McKinney on April 30, 2003: In the specification, after paragraph [0088], the redundant phrases:

"Claims

[c1]

1. An integrated circuit comprising:"
has been cancelled.

Remarks

Art Unit: 2818

3. During a telephone conversation with Mr. Jeffrey A. McKinney on April 30, 2003, Mr. McKinney revealed that redundant phrases at the end of the Detailed Description, after paragraph [0088] could not be found in electronic copy of the Application, and requested for an Examiner Amendment to cancel such redundant phrases presented in the hard copy of the Application. In response to Applicant's request, the amendment has been made above.

In addition, Applicant's argument(s), see Paper No. 8, filed 05/06/2003, with respect to claim(s) 21-35, have been fully considered, but they are not persuasive. Examiner does not agree with the argument that "Glenn's invention concerns a package, ..., not an integrated circuit *per se*". As stated in the Merriam-Webster's Collegiate Dictionary (tenth edition), "integrated circuit" is "a tiny complex of electronic components and their connections that is produced in or on a small slice of material". Figures 7-9, and 13b of Glenn show a device having tiny complex of electronic through holes 14, contacts 27, ends 26a, and balls 28, which are absolutely electronic components, and also metallization connections between ends 26a and ball 28. These electronic components and connections are produced in and on a small slice of material 13. Therefore, by definition of the Merriam-Webster's Collegiate Dictionary, the device as shown in figures 7-9 and 13b of Glenn is an integrated circuit.

For this reason, the rejection of the pending claims in the previous Office Action, in light of the above remarks, is not withdrawn.

Conclusion

4. **THIS ACTION IS MADE FINAL.** A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
